FOR SUPPLIEMENTS

BMS Always Caring, Always Here

History

2012

2022

BMS Medical was founded in **2012** in Jeddah, Saudi Arabia. It was added to BMS Group companies later on 2020. After acquiring by BMS Group, BMS Medical has managed to serve more than 50+ healthcare provider across the kingdom by providing them with biomedical solutions. Along with the Head Office in Jeddah, our offices network has expanded to Riyadh, Abha and Dammam, to ensure giving the best help to healthcare providers.

Our Vision

BMS Medical has always put the quality of solution given to the healthcare provider should meet the highest standards for the sake of people's lives.

Creating a solution for healthcare providers with exact need with a good value. Values: Clarity and transparency stand as a standard value for BMS Medical. Creativity in creating what eases the life of the patient is what motivates our teams. And BMS Medical has proved its accountability in many complex cases.

Clinical & Exam Room Solutions

Advancing the quality of your clinical care

We understand that today's healthcare reality presents a host of challenges to your clinical, financial and operational success. That's why we work closely with medical professionals to develop the clinical and exam room advancements that matter

*Relentlessly adding value
to your clinical care*

Cart configurations range from the very basic to fit within space constraints or budget limitations, to the sophisticated that provide the added functionality required by Anesthesia, Specialty Procedures and other critical applications.

ProcedureCarts

Unique side storage units provide key

Our bed head units are made of extruded aluminum alloy 6060 (hardened and tempered treatment) which guarantees to the profile high strength and durability.

Bed Head Units

500 mq500 mq were cutting machines and tooling machines create what it will be the bed head units realized under custom require-ments. Finally tested to ensure fully complying to CEI 6CEI 1-101-6060601 and CEI 6CEI 2-1-201-1-6060601 Elettronedical device tests directive.

Bed Head Units for Kids

- Cofigurations
- Special Image And Pattern
- Multiple electrical lines
- Single Or double din roll

Vertical Bed Head Units

Are primarily needed in patient rooms in medical facilities

Depending on their purpose, these units are equipped with medical gas outlets, high voltage and low voltage distribution of electricity, media sockets etc

All for The End Users

S8 Defibrillator Monitor

The most convenient and effective lifesaving
As the most important part of CPR, time is of the essence with the defibrillator monitor. Therefore, the S8 forgoes complex operations to improve the convenience and efficiency of rescue

S5 Defibrillator Monitor

Comprehensive function
With Defibrillation, Pacing, Monitoring and AED is not only suitable for pre-hospital first mode, S5 aid, but also applicable in in-hospital usage

600/700-AX Anesthesia Machine

In addition to anesthesia, it can do a lot more SIMV supports the smooth transition to anesthesia resuscitation, promotes resuscitation efficiency, and reduces lung injury caused by man-machine confrontation. CPAP/PSV supports postoperative respiratory therapy to help patients to wean successfully and reduce the dose of sedatives and muscle relaxants applied

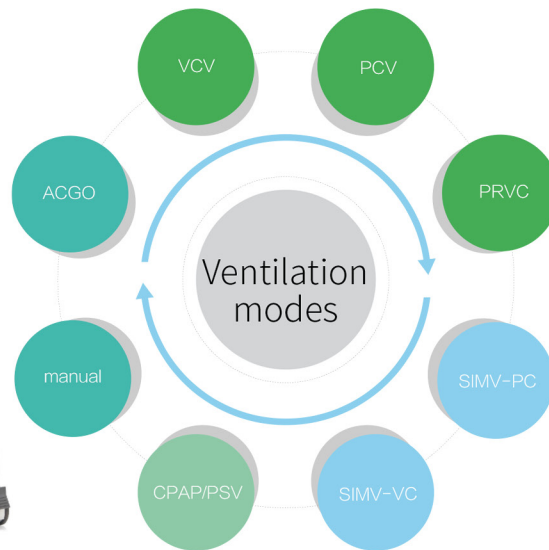

It is an all-rounder, good at all kinds of anesthesia and ventilation

800-AX Anesthesia Machine

That's a real anesthesia ventilator. Machine-controlled ventilation, adjustable ventilation, synchronous ventilation, and support ventilation are all available, even beyond the functions of most ventilators.

Get back to the basics give you more precise ventilation

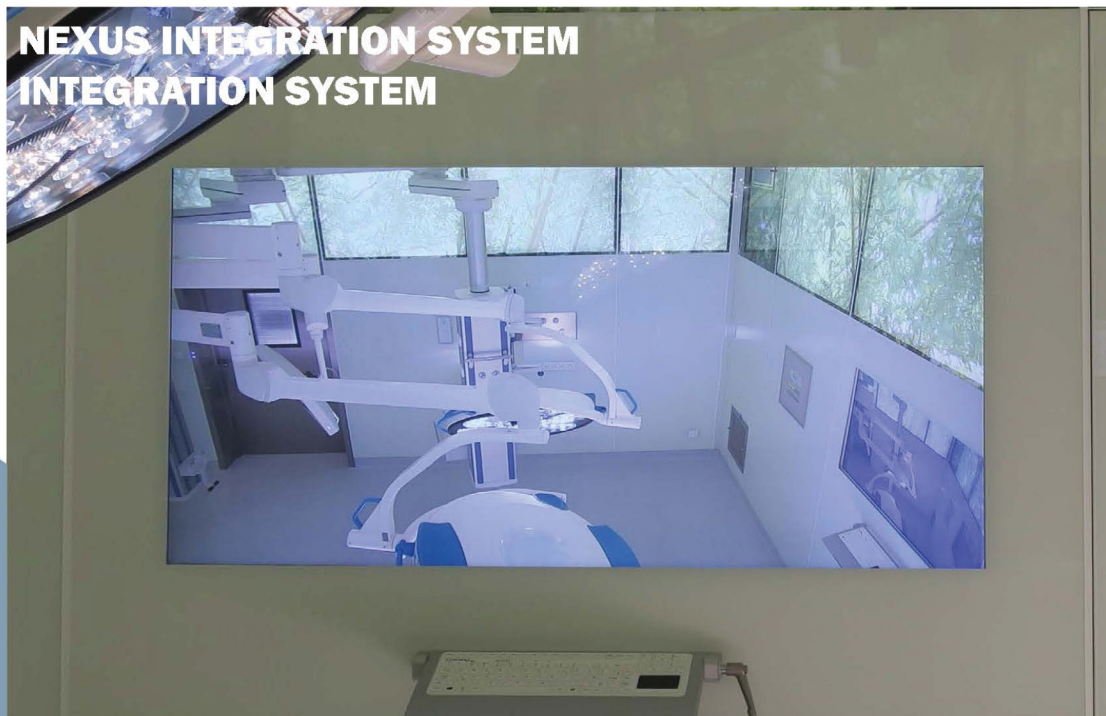

NEW
TECHNOLOGIES
IN GOOD
LIGHT

Lightweight, compact design with a circular shape. The casing is made of powder coated aluminum with the safety glass on the bottom part. The construction guarantees easiness of use and cleaning. By applying a small amount of external elements the dome is well protected against water and dust. Two handles – the sterile handle allows focusing of the light spot. The non-sterile handle surrounds the dome of its circumference, which provides independent access and makes the positioning %75 in more than very easy

Operating table models from medifa

Medifa 5000 Basic

The mobile basic operating tables of the series medifa 5000 Basic are robust ambulance tables, emergency transporters and fold operating tables that are suitable for extreme conditions (no permanent power supply).

Medifa 5000

The operating tables of series medifa 5000 are characterized by a very attractive price-performance ratio and the widest diversity of variants on the world market.

Medifa 7000

The medifa 7000 mobile operating table is the all-rounder among the medifa operating tables. In terms of flexibility and expandability, optimum base height (580 mm), ease of use and extremely high load capacity (544 kg total load), this operating table meets the highest requirements in the operating room.

Medifa 6000

The mobile universal operating table medifa 6000 can be used in different medical specialties in the outpatient and inpatient area. Especially for orthopaedic surgeries it is ergonomically usable thanks to the electro-hydraulic leg rest adjustment. A high degree of economy and intelligent functionality ensure efficient workflow, ease of use and a high load capacity (454 kg total load).

**ARE YOU PREPARED TO
HELP IN A HEARTBEAT?**

NOT ALL AEDS ARE CREATED EQUAL

ZOLL's proprietary Real CPR Help technology helps guide rescuers to perform CPR in accordance with the most recent guidelines for depth and rate of compressions. You will know when you are delivering high-quality CPR. The user-friendly and intuitive design of the ZOLL AED Plus will help give unexpected heroes the confidence and knowledge they need to treat SCA.

Radiology & Ultrasound Departments

In-house Developed & Manufactured Transducers

Alpinion develops and manufactures transducers in-house
 Reliable quality / Best compatibility / Cheaper maintenance / Faster repair

ALPINION MEDICAL SYSTEMS We are Ultrasound Professionals

The E-CUBE8 high-performance transducers and system provide you with high-resolution images. Clear images assist you to perform examinations quicker and obtain more accurate diagnoses.

Satisfaction with Image Quality

NEW PRODUCT

E-CUBE8 DIAMOND

Everlasting productivity

E-CUBE 12

Bringing excellence to daily care

The E-CUBE 12 helps medical practitioners make quick and accurate diagnoses. Moreover, with its simple and user-friendly features, they can provide more patients with medical services in the same amount of time. The E-CUBE 12 gives medical practitioners more time to focus on their roles and to provide patients a more comfortable and positive healthcare experience. By using the E-CUBE 12, medical practitioners can earn a deeper trust from their patients and ultimately advance their clinic's success.

Simplified to be your best

Efficiency & productivity

The E-CUBE 12 provides a user and patient-oriented design and workflow. You can focus more on taking care of patients, as the E-CUBE 12 can be used easily and conveniently in different clinical environments with various time and space limitations. It also provides a comfortable and pleasant healthcare experience for patients.

SSD for quick examination preparation
The use of high-end hardware and an SSD enhances stability when using the system, and the fast booting time makes speedy preparation for examinations possible.

Gel warmer developed for patient convenience
The gel warmer warms up the ultrasound gel before examination. The temperature can be adjusted in three steps according to examination circumstances. This will help patients relax and undergo an examination more comfortably.

Compact transducer connectors and system
The E-CUBE 12's transducers have compact and light connectors. The system is slim yet it does not take up much space even with up to four transducers connected. You can scan patients more comfortably, and disconnect or reconnect the transducers easily and conveniently even in a tight space.

SLEEP DIAGNOSTICS SYSTEMS

PORTI 7

The Porti 7 is an ideal diagnostic tool for the identification of sleep disordered breathing, for use at home or in hospital. It comes as standard with 10 channels, but with the option of extending up to 24 channels. Porti 7 additional features include:

- Fast direct download via USB connection.
- No memory card required, all patient data is stored in the internal memory.
- Visual battery check on front of unit. LED's show the remaining battery life.
- No ON/OFF switch, uses an automatic start via programming in the Porti software. Can program up to 6 nights of start/finish times.

PORTI 8

The Porti 8 is a modular system that caters for all; it may be used as a simple ambulatory screening device to a complete polysomnography application with up to 38 channels. With its small ergonomic profile the Porti 8 has been designed for optimum patient comfort and can be easily applied by the patient. The channels that are recorded by the Porti 8 are:

Automated Pharmacy Solutions

CAPSA SOLUTIONS[®]

A healthcare market leader for over 50 years through inventive product design and commitment to customer support.

MEDICATION MANAGEMENT AND ORGANIZATION

Avalo[®] Series Medication Carts

Avalo Series medication carts excel in areas that make the difference for nurses, like easy usage and access, a wide range of drawer configurations, enormous capacity, and smooth drawer action. For the pharmacy, Avalo yields consistently high user ratings, proven lock systems, and the ability to refurbish panels for lasting value.

The Avalo Difference

- Modular design for simple component replacement and refurbishing
- Support virtually all medication delivery systems including punch cards, auto-packaging, unit dose box
- High-density panels prevent denting or corrosion
- 3", 6", and 10" seamless drawers
- Unique integrated drawer divider system
- Full selection of accessories and lock systems
- Maximize work space with several computing mount options for EMR/EHR.

Avalo Medication Carts are long-lasting and a superior value.

KIRBY LESTER AUTOMATION ROBOTIC DISPENSING

Kirby Lester KL60

Space-Efficient Robotic Dispensing

The Kirby Lester KL60 redefines pharmacy automation. Technology doesn't have to be too big, expensive, or complex to yield dramatic workflow improvements and fast ROI.

Automate only what makes sense. 60 medications equates to:

- 35-40% (or more) of total daily prescriptions handled by the KL60
- Dramatic reduction in potential shrinkage/loss
- Better inventory management of your most common medications
- No "slow movers" that expire before dispensing

Fit your pharmacy space

- Less than 4' deep, well-suited for tight floor plans
- Remodeling is rarely needed; remove one bay of shelving, and roll the KL60 in its place

92% of KL60 users reported that the technology reduced time and stress during pharmacist check.

KIRBY LESTER AUTOMATION SECURE ROBOTIC DISPENSING

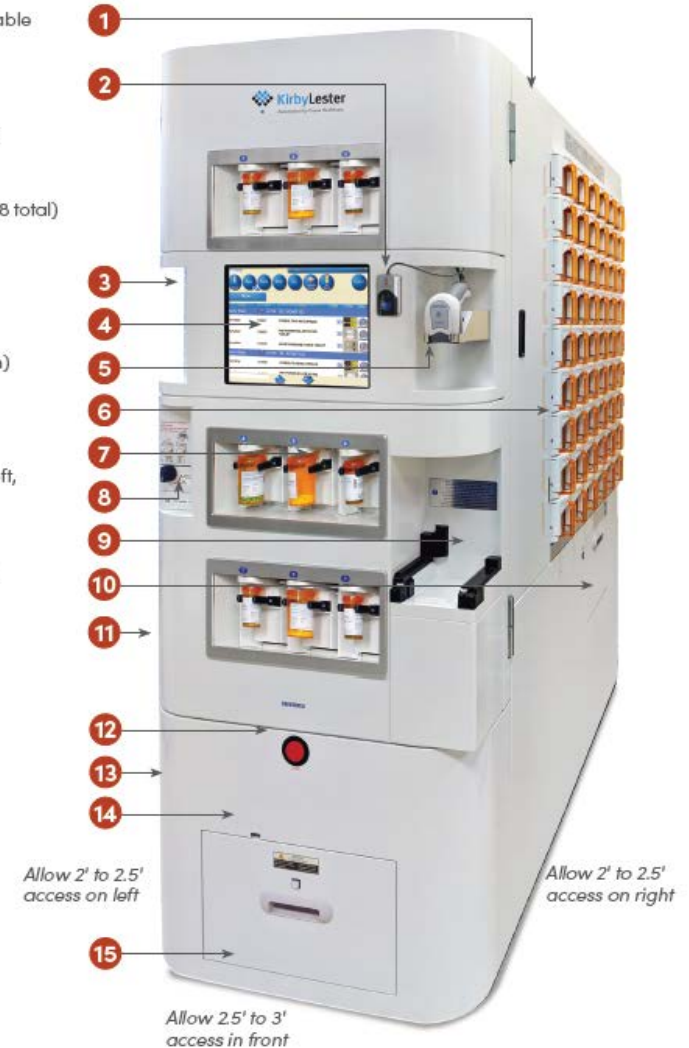

Kirby Lester KL-SR Components

Everything Within Easy Reach

Finding your way around the KL-SR is simple. Pharmacy staff members will find everything within easy reach to manage prescription filling.

- 1 Power Cords, Network Cable
- 2 Fingerprint Scanner
- 3 Main Door Latch
- 4 15" Touchscreen Monitor
- 5 Barcode Scanner
- 6 54 Cassettes Per Side (108 total)
- 7 9 Vial Pickup Windows
- 8 Camera Chamber
- 9 Cassette Station
- 10 Vial Bin (13, 16 or 20 dram)
- 11 Vial Bin (40 dram)
- 12 Emergency Stop
- 13 PC, Keyboard, Mouse (Left, Inside)
- 14 Thermal Label Printer
- 15 Underneath: 6 Casters, 4 Leveling Feet

Full Line of Pharmacy Automation:

Plenty of Options For Safety and Efficiency

For retail, hospital outpatient and specialty pharmacy prescription filling. Whether you just need to count medications quickly, or eliminate dispensing errors, or you are ready for full automation, there is a perfect - and affordable - Kirby Lester system for you.

Kirby Lester KL1

Eliminate hand counting, and save time and money by eliminating overcounts and undercounts. Just pour and count – no calibration needed.

KL1 is 6-14 seconds faster than hand-counting (60- to 90-count)

Kirby Lester KL1Plus

Scan-verify plus count every prescription to avoid filling errors. Includes electronic C-II log and online records to manage narcotics inventory and fills. Verification software alerts if the wrong medication, dosage or quantity is chosen. Provides a record of every fill, up to 10 years. Biometric user login, and pharmacy management system interfacing.

KL1Plus prevents 2.7 errors/week

Kirby Lester KL-SR Secure Robot

The most secure technology for safe dispensing, including controlled medications. The Kirby Lester KL-SR has an industry-first cassette calibration system onsite – universal locking cassettes can handle any NDC, and never need recalibration. Locked cassettes and updated FillSafe security system protect your inventory and guard against unauthorized access. Automates 108 medications – more than 50% of total daily orders. Includes biometrics for user tracking and reporting.

Certified ISO 27001:2013

RoboWall

24/7 Patient Prescription Pickup

RoboWall is a community pharmacy's 24/7 prescription pickup center for patients to retrieve completed orders at their convenience. RoboWall can be installed indoors or outdoors and is ideal for limiting human interaction. Patients find anytime pickup highly advantageous, and the pharmacy staff's time is available for other activities.

Main Benefits

- Fewer touchpoints/Promotes distancing
- Patient convenience
- Two unique designs (Classic and Carousel) to suit the pharmacy's volume and space
- High capacity: Store from 224 to 700+ filled patient orders
- Install anywhere, e.g., outside or in lobby, health center, grocery, metro station
- Controlled system, all actions logged, full data available
- Heighten your visibility and branding

RoboWall Components

- Pharmacy Tech workstation (barcode-driven) on internal side
- Flatscreen display on patient-facing side
- RoboWall software
- SMS (text messaging) module
- Instructions and space for branding & advertising

Automate More Of Your Pharmacy

RoboWall is part of RoboPharma's end-to-end solutions for community pharmacies. Ask about our technologies for automated dispensing, ScriptShelves organized will call, and integrated HomeDeliveries system.

Patients access their prescriptions when it suits them - simple, secure, and private

Classic

Carousel

Multiple models available from designs as small as 1m²; capacities up to 700+ filled orders; room for custom-branding

RoboWall

Filling (inside)

After filling a patient order, the technician signs into RoboWall. The software chooses an available location in the carousel and guides the technician where to place a filled patient order. Barcode-scan match is possible. Then RoboWall notifies the patient that the prescription is ready.

Software and barcode-scans guide pharmacy staff to the next available location for order storage

Pickup (outside)

After receiving an SMS message (text) from RoboWall, the patient enters the unique PIN-code and date of birth to retrieve the order. All transactions are registered.

Patient retrieval less than 10 seconds

Specifications & Considerations

- RoboWall Carousel: 224 positions (max), configurable; External size 1050mm D x 857mm W x 2000mm H
- RoboWall Classic: Expandable for 700+ positions; External size built to suit available space, as little as 1m²
- Stainless steel secure construction
- Fits bags up to 30x40cm
- Patient notifications automatically sent by SMS (text)
- Patient retrieval requires PIN and DOB
- Can operate stand-alone; or interface with your pharmacy system or RoboPharma's ScriptShelves software; or interface with your HQ software (for multiples)
- Networking multiple RoboWall sites available
- Pharmacy tech time to fill 1 order: <10 sec.
- Patient time to retrieve 1 order: <10 sec.

- CA12 12 drawers of 3 l
- CB 2 drawers of 25 l

Springdose

Spring controlled Unit dose dispensing.

Ideal system for maximum control of certain products: narcotics, high cost drugs, etc.

- Dispensing by a closed system, no external access possible, aluminium finish
- Maximum safety when taking out the dose or multidose per patient and user, with no further access to products or doses other than those requested to the system.
(authorized staff cannot withdraw without control more medication than the one entered in computer of the dispenser)
- Operated through a touch screen with password access
- Availability of several modules adapted to the needs of each nursing unit
- Comprehensive connectivity with different services and areas of the Hospital
- Meets the storage "KANBAN" System.
(It dispenses the drug that most time is stored, minimizing the risk of expiry)
- Dispenses protocols individually or in the forms of packs

Refricontrol

Ideal for thermolabile drugs

- A fridge designed to store medication
- Steel-plated body covered with PVC
- 247 liters of capacity
- Anti-steam glass door
- Acoustic electronic alarm
- Thermometer and curved glass

Capacity in liters	247
Levels of exposure	7
Inside temperature	+1°--+6°
Average relative level of humidity	45%

Autodrugs Mix (Springdose + Electrostock)

Ideal combination that offers an option for drugs of maximum control and another for the rest of products
